

Plan to Continue Sampling- Process

Typical Sampling Locations

- Yard Area
- Drip Zone or Downspout
- Other Areas

Soil Sampling with XRF

- Sample 0-3" depth at all sample locations on the Property.
- Sample 2 locations from Front and Back Yards to 18" and analyze depths from 3-6", 6-12", and 12-18".
- Collect 10% of the total samples which will be sent under a chain-of-custody for confirmation by laboratory analysis.

Exterior Paint Sampling with XRF

- Collect up to 6 samples of exterior painted surfaces of structures if surface is in poor condition.
- Collect 2 paint chip samples for laboratory analysis if present.
